Professional Summary

As a Python Developer with a Bachelor's in Computer Science and Engineering, I am passionate about building innovative software solutions, enhancing my technical skills, and contributing to meaningful projects. I am seeking a role in a forward-thinking, technology-driven organization where I can apply my knowledge and continue to grow professionally.

Experience

Python Trainee — ZKTeco India

Feb 2026 – Present

- Contributed to the development and maintenance of the **EasyTime Pro** attendance management system using **Python**, **Django**, and **SQL**.
- Developed backend modules for attendance, shift scheduling, leave management, and access control.
- Built and integrated **REST APIs** with biometric attendance devices.
- Validated attendance data and optimized database operations using **SQL**.
- Performed functional testing, debugging, and bug fixing to improve application reliability.
- Designed and developed responsive, user-friendly frontend interfaces for the EasyTime Pro application using HTML, CSS, JavaScript, and Django templates.

Technical Skills

Python: OOP, file handling, logical problem solving, and exception handling.

SQL: Query writing, joins, grouping, and working with Oracle SQL*Plus.

Web Development: HTML, CSS, JavaScript, DOM manipulation, responsive layouts.

Django: Django framework including MVT architecture, ORM, authentication, CRUD operations, template handling, form validation, and backend development. Experienced in writing complex database queries, model relationships, query optimization, and integrating REST APIs.

REST API: Django REST Framework (DRF), including serializers, function-based and class-based views, viewsets, routers, authentication, permissions, CRUD operations, API integration, request and response handling, JSON data processing, pagination, filtering, and mixins for reusable API functionality.

FastAPI: REST API development, async endpoints, dependency injection, authentication, authorization, middleware, and SQLAlchemy.

Docker: Dockerfiles, images, containers, port mapping, container management, and application containerization.

Projects

Brain Tumor Detection using Deep Learning and Genetic Algorithm

Developed a system for automated brain tumor detection in MRI images using image processing and optimization through Genetic Algorithm with an accuracy of 97%.

College Leave Management System

Implemented a Leave Management System for the college that automates leave applications, approvals, and tracking.

Portfolio Website

Developed a responsive personal portfolio using HTML, CSS, and JavaScript highlighting technical skills and projects.

Education

Bachelor of Technology in Computer Science and Engineering

2021–2025

Universal Engineering College, Thrissur

CGPA: 9.15

Higher Secondary Education

2019–2021

Chentrappinni HSS, Thrissur

Percentage: 98.3

Secondary Education*THSLC, Kodungallur*

Percentage: 98

*2019***Internship**

Full Stack with Python Intern – Cloud Innovations**Software/Tools Used**

Oracle SQL*Plus, VS Code, PyCharm, pgAdmin 4, Jira, SQL Server, Postman, VMware, Confluence, Swagger, GitHub, Source tree, Git, DBeaver.

Languages

English, Malayalam
